Important Safety Notices

1. Do not remove or modify any installed safety device on this equipment. Doing so will void your warranty and create an unsafe operating environment.

2. Dangerous voltages are present in this device. There are NO user serviceable parts inside.

3. Only allow qualified personnel to service this unit.

4. Do not use the unit if it is damaged in any way. Contact your dealer for repair or replacement information.

Warranty

Ocean Optics Germany GmbH warrants to the original user of this instrument that it shall be free of any defects resulting from faulty manufacture of this instrument for a period of 12 months from the original data of shipment.

This instrument should not be used for any Clinical or Diagnostic purposes. Data generated in these areas is not warranted in any way by Ocean Optics Germany GmbH. Any defects covered by this Warranty shall be corrected either by repair or by replacement, as determined by Ocean Optics Germany GmbH.

There are no warranties that extend beyond the description herein.

This Warranty is in lieu of, and excludes, any and all other warranties or representations expressed, implied, or statutory, including merchantability and fitness, as well as any and all other obligations or liabilities of Ocean Optics Germany GmbH including, but not limited to, special or consequential damages. No person, firm, or corporation is authorized to assume for Ocean Optics Germany GmbH. Any additional obligation or liability not expressed provided for herein except in writing duly executed by an officer of Ocean Optics Germany GmbH:

Ocean Optics Germany GmbH

About This Manual

Document Purpose and Intended Audience

This document provides you with an installation section to get your system up and running.

What’s New in this Document

This version of the Halogen Light Source with Attenuator and TTL-Shutter HL-2000-FHSA / HL-2000-FHSA-LL / HL-2000-FHSA-HP Installation and Operation Manual updates logo and the contact information, and the bulb replacement instructions

Product-Related Documentation

You can access documentation for Ocean Optics products by visiting our website at http://www.oceanoptics.com. Select Support → Technical Documents, then choose the appropriate document from the available drop-down lists.

Upgrades

Occasionally, you may find that you need Ocean Optics to make a change or an upgrade to your system. To facilitate these changes, you must first contact Customer Support and obtain a Return Merchandise Authorization (RMA) number. Please contact Ocean Optics for specific instructions when returning a product.
Chapter 1

Setup

Overview

The following sections provide instructions on unpacking and setting up your HL-2000-FHSA Light Source.

Before using the HL-2000-FHSA for the first time, check for transport damage. Be sure to adhere to all warnings on the unit and in this manual.

Unpacking the HL-2000-FHSA

► Procedure

1. Unpack your lamp assembly carefully. Dropping this instrument can cause permanent damage.
2. Inspect the outside of the instrument and make sure that there is no damage. Do not use the instrument if damage is present. Contact your dealer for repair or replacement information, if necessary.

3. Use this instrument in a clean laboratory environment.

Contents

Your HL-2000-FHSA package should contain the following:

- HL-2000 Light Source
- One IC-DB15-2 interface cable for shutter operation

Setting Up the HL-2000-FHSA Light Source

Use the following procedure and refer to HL-2000-FSHA Diagrams to set up your light source.

► Procedure

Perform the steps below to set up your HL-2000-FHSA Light Source:

1. Plug the power supply into a wall outlet.

2. Plug the other end of the power supply cable into the socket of HL-2000-FHSA.
3. Connect the SMA connector of your fiber optic cable to the SMA plugs.

4. Turn the Halogen lamp on using the power switch on the rear of the HL-2000-FHSA.

---

**Enabling Automatic Shutter Control**

The HL-2000-FHSA is equipped with a 15-pin TTL port on the rear of the unit that allows an external source to control the shutter of the HL-2000-FHSA.

► **Procedure**

To enable automatic shutter control (TTL), perform the following steps:
1. Insert the supplied IC-DB-15-2 15 pin connector into the port on the rear of the HL-2000-FHSA.

![HL-2000-FHSA Rear View](image)

2. Move the shutter switch on the rear of the unit into the appropriate position to select the shutter mode.
   - Open – Shutter open
   - Close – Shutter closed
   - TTL – Controlled by external TTL (High = Open, Low = Closed)

---

**Note**

Use Ocean Optics software to save a dark measurement.

---

**Optimizing the Optical Power Output**

The HL-2000-FHSA is adjusted at the factory to provide maximum power into a 200µm fiber. If a lower optical power is required or a different fiber (bundle) diameter is used, you can adjust the optical power of the unit. Refer to [HL-2000-FSHA Diagrams](#) while using the following procedure.

▶ **Procedure**

Follow the steps below to adjust the optical power of the HL-2000-FHSA Light Source:

1. Connect a fiber optic spectrometer or an optical power meter to a fiber, and then connect the other end of the fiber to the HL-2000-FHSA’s SMA plug.

2. Loosen the blocking screw with the provided 1.3mm Allen wrench.
3. Shift the SMA socket to optimize the optical power of the HL-2000-FHSA.

4. Tighten the blocking screw to secure the SMA socket position.

### Attenuating the Optical Power Output

The HL-2000-FHSA allows you to attenuate the optical output of the unit by adjusting the attenuation screw.

**Procedure**

To attenuate the optical output of the HL-2000-FHSA, follow the steps below:

1. Ensure that the shutter switch on the rear of the unit is in the open position.
2. Loosen the fixture screw with the provided 2.0mm Allen wrench.
3. Turn the attenuation screw until the desired optical power is achieved.
4. Tighten the fixture screw when finished.
5. To attenuate the optical output of the HL-2000-FHSA, turn the attenuation-screw clockwise.

**Caution**

The attenuation screw can prevent the shutter from opening if turned clockwise too far. If the shutter is not working, turn the attenuation screw counterclockwise.

Appendix A

Bulb Replacement

Overview

To order replacement bulbs for the HL-2000-FHSA, consult the Parts List.

WARNING

Before replacing the bulb in the HL-2000-FHSA, disconnect the lamp from your power source and allow the unit to cool for at least twenty minutes, if necessary.

Replacing the Bulb

► Procedure

Refer to Figure 5 and perform the steps below to replace the bulb in the HL-2000-FHSA Light Source:

1. Unplug the power connector from the power socket on the HL-2000-FHSA.

2. Loosen the screws on the rear of the unit with the provided 2.5mm Allen wrench.

3. Remove the rear of the HL-2000-FHSA and remove the electronics board from the unit, taking particular care not to disconnect the fan wires.

4. Loosen the bulb fixture screw from the bottom of the unit with the provided 1.3mm Allen key.

Note

Do not completely remove the bulb fixture screw. It may be hard to reinsert it.

5. Remove the bulb from the HL-2000-FHSA.
6. Disconnect the wires from the connection block.

7. Replace the bulb and reconnect the wires to the connection block.

8. Slide the lamp into the housing and secure with the bulb fixture screw.

9. Slide the electronics board back into the HL-2000-FHSA, taking particular care to ensure that the wires do not come into contact with the fan blades.

---

**Note**

The bulb fixture screw is above the fan, behind the blades. Turn the blades, if necessary, to reach the screw.
