Important Safety Notices

1. Do not remove or modify any installed safety device on this equipment. Doing so will void your warranty and create an unsafe operating environment.

2. Dangerous voltages are present in this device. There are NO user serviceable parts inside.

3. Only allow qualified personnel to service this unit.

4. Do not use the unit if it is damaged in any way. Contact your dealer for repair or replacement information.

Product-Related Documentation

You can access documentation for Ocean Optics products by visiting our website at http://www.oceanoptics.com. Select Technical → Operating Instructions, then choose the appropriate document from the available drop-down lists. Or, use the Search by Model Number field at the bottom of the web page.

You can also access operating instructions for Ocean Optics products on the Software and Technical Resources CD included with the system.

Engineering-level documentation is located on our website at Technical → Engineering Docs.

Upgrades

Occasionally, you may find that you need Ocean Optics to make a change or an upgrade to your system. To facilitate these changes, you must first contact Customer Support and obtain a Return Merchandise
Authorization (RMA) number. Please contact Ocean Optics for specific instructions when returning a product.
Chapter 1

Setup

Setting Up the HL-2000 Light Source

Use the following procedure and refer to HL-2000 Diagrams to set up your light source.

► Procedure

Perform the steps below to set up your HL-2000 Light Source:

1. Plug the power supply into a wall outlet.

---

Note

The HL-2000-HP Series of light sources requires a 24 VDC power supply. Do not use the standard 12 VDC power supply.
2. Plug the other end of the power supply cable into the socket of HL-2000.

3. Connect the SMA connector of your fiber optic cable to the SMA plugs.

4. Turn the Halogen lamp on using the power switch on the rear of the HL-2000.

## Optimizing the Optical Power Output

The HL-2000 is adjusted at the factory to provide maximum power into a 200µm fiber. If a lower optical power is required or a different fiber (bundle) diameter is used, you can adjust the optical power of the unit. Refer to [HL-2000 Diagrams](#) while using the following procedure.

► **Procedure**

Follow the steps below to adjust the optical power of the HL-2000 Light Source:

1. Connect a fiber optic spectrometer or an optical power meter to a fiber, and then connect the other end of the fiber to the HL-2000’s SMA plug.

2. Loosen the blocking screw with the provided 1.3mm Allen wrench.

3. Shift the SMA socket to optimize the optical power of the HL-2000.

4. Tighten the blocking screw to secure the SMA socket position.

Appendix A

Bulb Replacement

Overview

To order replacement bulbs for the HL-2000, consult the *Parts List*.

---

**WARNING**

Before replacing the bulb in the HL-2000, disconnect the lamp from your power source and allow the unit to cool for at least twenty minutes, if necessary.

---

Identifying the Bulb Type

► *Procedure*

Perform the steps below to identify the bulb type:

1. Unplug the power connector from the power socket on the HL-2000.
2. Loosen the screws on the rear of the unit with the provided 2.5mm Allen wrench.
3. Remove the backside of the HL-2000 and remove the electronics board from the HL-2000, taking particular care not to disconnect the fan wires.
4. Remove the screws from the bottom plate of the unit with the provided 1.3mm Allen key.
5. Inspect the bulb for the bulb code/description. The bulb codes and descriptions are as follows:

<table>
<thead>
<tr>
<th>Bulb Code</th>
<th>May 2003 and Later - Description</th>
<th>Before May 2003 - Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HL-2000-B</td>

</tr>
<tr>
<td>HL-2000-BL</td>
<td>Cable: Black and yellow Small housing AD = 13mm</td>
<td>Cable: Black and red Small housing AD = 13mm Ring marker</td>
</tr>
<tr>
<td>HL-2000-B-HP</td>
<td>Cable: Black and blue Small housing AD = 13mm</td>
<td>Cable: Black and red Small housing AD = 13mm Bigger bulb</td>
</tr>
</tbody>
</table>

Replacing the Bulb

► Procedure

Refer to Figure 5 and perform the steps below to replace the bulb in the HL-2000 Light Source:

1. Unplug the power connector from the power socket on the HL-2000.
2. Loosen the screws on the rear of the unit with the provided 2.5mm Allen wrench.
3. Remove the backside of the HL-2000 and remove the electronics board from the HL-2000, taking particular care not to disconnect the fan wires.
4. Remove the screws from the bottom plate of the unit with the provided 1.3mm Allen key.
5. Remove the bulb from the HL-2000.
6. Disconnect the wires from the connection block.
7. Replace the bulb and reconnect the wires to the connection block.
8. Slide the lamp into the housing and secure the housing with the bottom screw.
9. Slide the electronics board back into the HL-2000, taking particular care to ensure that the wires do not come into contact with the fan blades.
